

FLOOR SCRUBBERS MACHINE **D8 RIDE ON**

Motor Voltage	24 v (DC)
Brush Motor Power	2 x 400w
Suction Width	1000 mm
Suction Motor	500 w
Brush Diameter	650 mm
Brush Rotation Speed	180 rpm
Traction Motor Power	500 w
Speed	0-6 km/h
Clean Water Tank Capacity	90 lt
Recovery Tank Capacity	100 lt
Cleaning Capacity	3800 m2/h
Weight	262 kg
Dimensions	140 x 75 x 139 cm

The 100-liter capacity of the dirty water tank, made from robust plastic, allows the machine to operate continuously in large areas without any interruptions.

Gel batteries stand out with their high energy efficiency and long-lasting performance. Developed for durable and seamless use, this battery type ensures reliable operation.

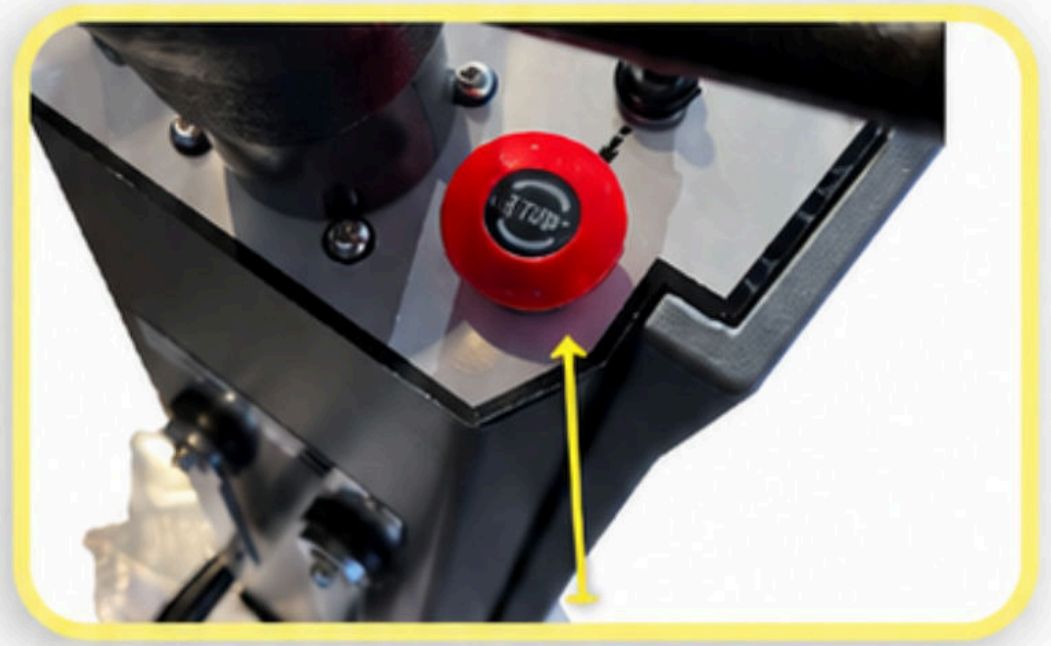

The manual nature of the brush and water pulley lowering handles offers users increased control and flexibility.

Ped holders are essential accessories used in cleaning machines. These holders ensure that cleaning pads remain securely in place, thereby providing an effective cleaning experience.

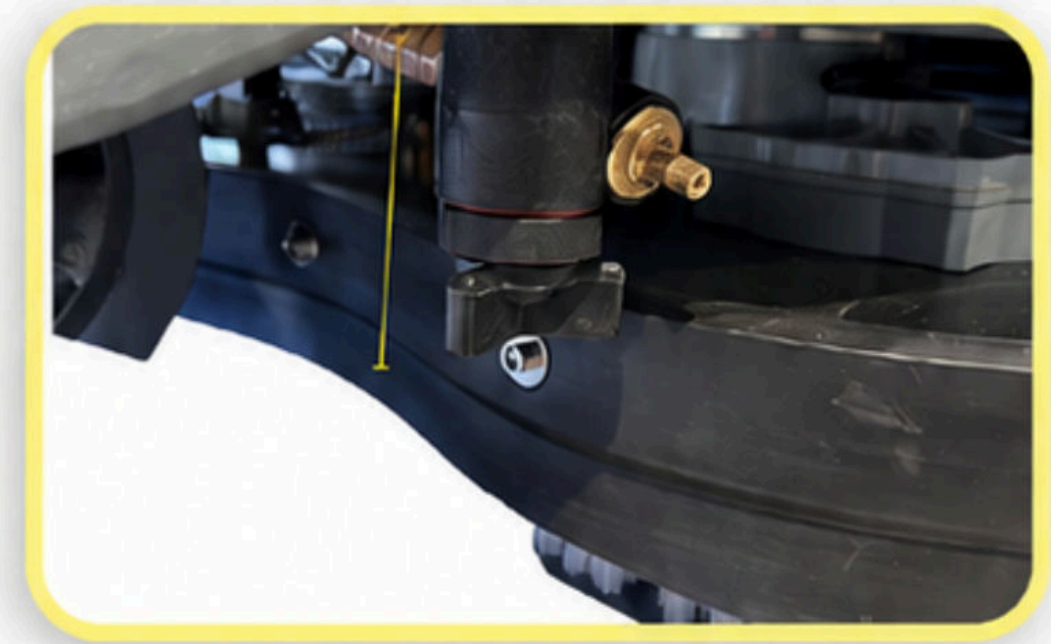

Charger On Board (COB) is a practical charging solution utilized in cleaning machines. This feature denotes a built-in charging unit within the machine, allowing users to conveniently recharge their cleaning equipment.

The emergency stop button is a vital safety feature that immediately halts the cleaning machine in case of danger, prioritizing the safety of the user and those nearby.

A well-designed and properly positioned water squeegee can significantly enhance cleaning efficiency and outcomes.

An effective water filter enhances the machine's performance and extends its lifespan. Additionally, it ensures the complete drainage of all clean water from the reservoir.
